

FAX RECEIVED
FEB 20 2008 #17**RESPONSE TO OFFICE ACTION**

The USPTO sent an Office Action dated March 5 2002 (Exhibit A). The applicant wishes to make several changes to the claims. Along with the corrected claims, the applicant's application draft has been slightly modified from the original. The modifications are mere corrections to typos. The new draft contains the new claims (shown in Exhibit B).

The applicant has made these changes to the claims:

Claim 1, on record, reads as following:

A golf club head for increasing the driving distance and the accuracy of the flying direction of a golf ball including a body shell, a face plate which being held on the body shell for striking the golf ball, and an internal wings mounted in the body shell for reinforcing the face plate.

has been modified to:

A golf club head for increasing the driving distance and accuracy of the flying ball comprised of: a body shell, and a faceplate which is being held on the body shell for striking the golf ball, and internal wings mounted inside the body shell for reinforcement.

Claim 2, on record, reads as following:

The golf club head, in the Claim 1, having coefficient of restitution in the range of 0.8 to 0.9, more preferably, 0.82 to 0.85.

has been modified to:

The golf club head from Claim 1; whereas the internal wings do not make physical contact with the faceplate.

Claim 3, on record, reads as following:

The thickness of the wings, in the Claim 1, is in the range of 0.1mm to 10mm, more preferably, 0.5 mm to 2mm.

has been modified to:

The golf club head from Claim 1, whereas the internal wings do not reinforce the faceplate.

Claim 4, on record, reads as following:
